

Derivanos el flulo, recordar que la denvada de ln x = \frac{1}{x} x'

\[
\frac{d\pha_B}{dt} = \frac{40 \cdot b}{2\pi} \big(\frac{r}{r+a} \big) \big(\frac{r}{r-a} \big(\frac{r+a}{r-a} \big) \frac{r}{r-a} = \big(\frac{dr}{dt} \big) \frac{r}{dt} = \frac{dr}{dt} \\
\frac{r^2}{r^2}
\]
